Summary

Backend-focused Full Stack Developer with 2.5+ years of experience building scalable web applications, designing REST APIs, integrating third-party systems, and optimizing data workflows.

Technical Skills

Languages: JavaScript, PHP, SQL, HTML, CSS, Python
Backend: Node.js, Laravel, REST APIs, Webhooks, Cron Jobs
Databases: PostgreSQL, MongoDB, MySQL, RagicDB
Frontend: Next.js, React.js, TailwindCSS, Bootstrap, AJAX, shadcn/ui, HeroUI
Tools & Integration: ICECAT API, Meilisearch, GitHub, Postman, n8n, GitHub Copilot, Cursor AI

Experience

Mind2web Aug. 2023 – Feb. 2026
Software Engineer *Mohali, Punjab*

- Built and optimized backend services and REST APIs for e-commerce and SaaS platforms using Node.js, Laravel, and PostgreSQL.
- Integrated ICECAT API to sync 80,000+ product records and developed automated data migration pipelines from RagicDB to PostgreSQL, reducing processing time from ∼1.5 days to ∼30 minutes.
- Implemented core e-commerce features including cart and checkout workflows with session management and role-based pricing logic.
- Enabled fast product discovery by integrating Meilisearch for search and filtering across 80,000+ products, and developed internal admin dashboards using Next.js and React.

Projects

Fuse | *B2B E-commerce Platform* Link

- Integrated ICECAT API to synchronize 80,000+ product records into PostgreSQL and implemented Meilisearch for fast product search across 80,000+ items.
- Developed automated data migration pipelines from RagicDB to PostgreSQL and improved data processing efficiency using batch operations.
- Implemented key e-commerce features including cart and checkout workflows with role-based pricing and session handling.

Takeoff.Guru | *AI-powered Construction Estimation Platform* Link

- Contributed to development of a SaaS platform that automates construction estimation by analyzing architectural drawings and generating material quantities.
- Built product features including quotation generation and draft-saving workflows to streamline user operations.
- Developed backend APIs and internal dashboards supporting project estimation workflows and operational analytics.

Naati Experts | *CCL Training Platform* Link

- Developed a full-stack training platform with authentication, role-based dashboards, and an admin panel for platform management.
- Integrated Stripe payment gateway to enable subscription plan purchases and payment processing.
- Implemented modules for trainer management, notes submission for feedback, and blog content management.

Education

I. K. Gujral Punjab Technical University Aug. 2019 – July 2023
Bachelor of Technology in Computer Science and Engineering ***CGPA: 8.16/10***

Achievements

Secured **Global Rank 123** in CodeChef Starters 98 (Division 4) among thousands of participants.

Solved **100+ data structure and algorithm problems** across competitive programming platforms including **CodeChef, LeetCode, GeeksforGeeks, and HackerRank**.
